

-32-

A METHOD TO PREVENT SIDE-EFFECTS AND INSENSITIVITY  
TO THE THERAPEUTIC USES OF TOXINS

ABSTRACT OF THE DISCLOSURE

5

A method which utilizes human-compatible  
antitoxin to facilitate treatment of a toxin, such as  
botulinum toxin, by avoiding autologous production of  
antibodies to the toxin which would diminish the efficacy  
10 of the toxin therapy.
